Checktel s2v-50-rss

Call Recorder VoIP - SIP

Checktel VoIP Call Recorder, line side VoIP call recorder, 50 concurrent calls

Description

Company grade telephone call recording.

Checktel Call Recording solutions offers high quality and company wide automatic call recording. Implemented on the line side / network side at the customers premise, Checktel can be used with any make or model PABX.
Mainly software based and therefore competitive priced.

Software application on Windows platform for both recording and playback.
Original sound quality with two sound channels. No compression or merging of channels, therefore excellent sound quality at reproduction.
Recorded calls can be played back on all major platforms.
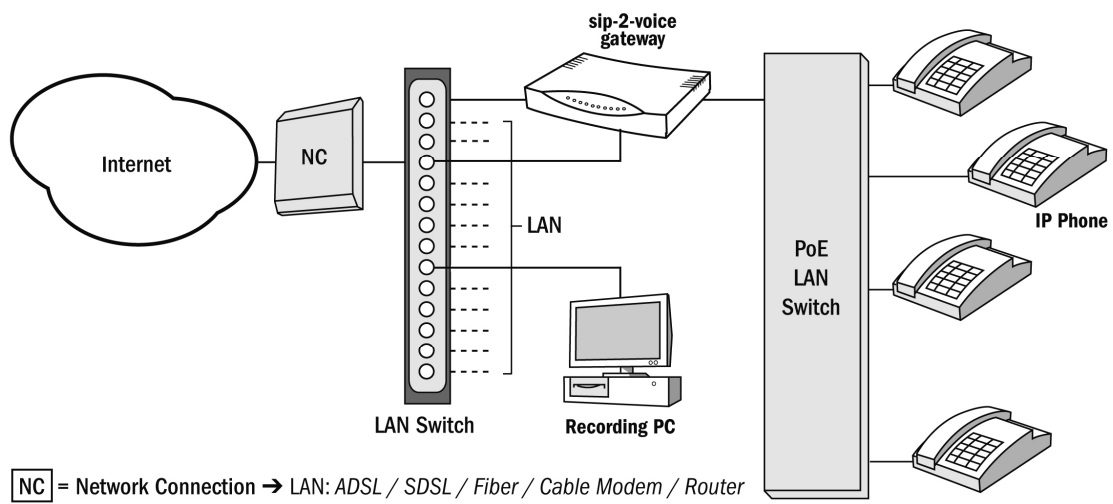

Features

- automatic call recording both incoming and outgoing telephone calls
- line side based: can be used with all telephony providers and telephone systems
- records all installed phones: wired, softphones, DECT, WiFi (BYOD) etc.
- recording of original digital voice data, no compression
- two separate audio channels (stereo) for near and distant party
- easy to use multi user search and playback software
- recorded calls can be played on all platforms
- calls can be exported to audio CD
- integrity check secures non manipulation
